

PRICES, WAGES & INDEX NUMBERS

2013-14

DIRECTORATE OF ECONOMICS AND STATISTICS

GOVERNMENT OF ANDHRA PRADESH

PREFACE

The publication entitled Annual Publication on Price Statistics (**Prices, Wages and Index Numbers**) for the year 2013-14 is a Annual Publication brought out by this Directorate, with an intention to provide Prices data, Wages data and related Index Numbers at one place keeping in view of their importance.

This publication contains Retail/Wholesale Prices of Essential Commodities, Prices of Agricultural Commodities, Livestock and Livestock Products, Daily Wages of Agriculture and Non Agriculture Labour, Index Numbers of Industrial Workers, Building Construction Cost Index and Wages of Construction Labour, Wholesale Prices and Inter-State Comparison statement pertaining to Consumer Price Index Numbers for Industrial workers, Agricultural Labour and Rural Labour, CPI (Rural, Urban and Combined), Commodity wise MSP and PDS Prices.

I hope this Publication would be useful to the Administrators, Research Scholars, Planners, Economists, Trade Unions, Other Organisations of both Public and Private and also General public at large.

Any suggestions for the improvement in the coverage and presentation of data will be highly appreciated.

Hyderabad.
Date: 13.10.2014

Dr.D.DAKSHINAMURTY

INDEX

Chapter	Subject	Contain	Page No.
1	Introduction		1-2
2	Prices	1) Prices	3-4
		2) Daily retail retail prices of 6 essential commodities	4
		3) Weekly retail prices of 30 essential commodities	5
		4) Wholesale Prices of 40 Agricultural commodities	5
		5) Agricultural prices	6-7
		6) Wholesale prices of Livestock, Livestock product & Livestock feed	8-9
		7) Building material prices	9-11
3	Wages	1) Wages of Agriculture & Non Agriculture Labour	12-14
4	Index Numbers	1) Consumer price Index numbers for Industrial workers	15-20
		2) CPI numbers for Agricultural labourers & Rural labourers	21-24
		3) Building construction cost Index	25
		4) Wholesale Price Index	26-27
		5) Consumer price Index numbers for Urban & Rural	28

Table No.	Subject	Page No
PRICES		
1	District-wise Monthly Average Daily Retail Prices of certain Essential Commodities	29-41
2	District-wise Annual Average Daily Retail Prices of certain Essential Commodities	42
3	Monthly State Average Daily Retail Prices of Essential Commodities	43-44
4	District-wise - Monthly Average Weekly Retail Prices of Essential Commodities	45-65
5	District Annual Average Weekly Retail Prices of certain Essential Commodities	66
6	Monthly State Average Weekly Retail Prices of certain Essential Commodities	67-68
7	Monthly State Average Wholesale Prices of 40 Agricultural Commodities	69-70
8A	Season - Wise Farm Harvest Prices (weighted) for the selected Agricultural Commodities	71
8B	District wise Season Wise Farm Harvest Prices of Principal Agricultural commodities	72-77
8C	Statement showing the Comparative Weighted Average Farm Harvest Prices	78
9	District-wise Annual Average of monthly Wholesale Prices of certain selected Livestock, Livestock Products	79-84
10(A)	District-wise Annual Average prices of quarterly Building Materials (Urban) for the selected materials	85-88
WAGES		
10(B)	District-wise Annual Average wage rates of construction workers	89
11	Monthly District and Category-wise Average Daily Wages of Agricultural Labour	90-101
12(A)	Monthly Category-wise Average Daily Wages of Agricultural Labour	102
12(B)	District and Category-wise Annual Average Daily wages of Agricultural Labour	103

INDEX NUMBERS		
13	Monthly Consumer Price Index Numbers for Industrial Workers f (Base: 2001=100)	104
14	Centre-wise Monthly Consumer Price Index Numbers for Industrial Workers by Groups & Sub-Groups	105-111
15(A)	Consumer Price Index Numbers for Agricultural Labour in A.P. and All India (Base 1986-87=100)	112
15(B)	Consumer Price Index Numbers for Rural Labour in A.P. and All India (Base 1986-87=100)	113
12(C)	Category-wise Index Numbers of Daily Wages of Agricultural Labour (Base 1980-81=100)	114
16(A)	Building Construction Cost Index in A.P - Urban (Base : 1988-89=100)	115
16(B)	Building Construction Cost Index in A.P - Rural (Base : 1988-89=100)	116
17	Index Numbers of Wholesale prices in India for all commodities (Base : 2004-05=100)	117
18	CPI Index Numbers for Rural, Urban & combined (Base: 2010=100)	118
19	MSP Prices of important Agricultural commodities	119
20	Prices of PDS Items	120
ANNEXURES		
Annexure No	Subject	Page No
I	Consumer Price Index numbers for industrial workers for all Central series entres and All India (Base: 2001=100)	121-123
II	Monthly Consumer Price Index Numbers for agricultural Labour for other States and All India for the year 2013-14 (Base'1986-87=100)	124
III	Monthly Consumer Price Index Numbers for Rural Labour for other States and All India for the year 2013-14 (Base'1986-87=100)	125

INTRODUCTION

Prices affect all sections of society and as such Price Statistics are regarded as the most important economic data. A constant watch on prices becomes necessary for the operation and regulation of planning and policy formulations. Changes in prices over a period of time can be gauged by the Index Numbers. During the inflationary period, the Government keeps a close watch on the behaviour and trend of prices and whenever any abnormality is noticed that will be checked well in time by taking appropriate corrective steps.

The Government of Andhra Pradesh have constituted a committee of Group of Ministers (GOM) for monitoring of Prices and to suggest measures to be taken to control the prices of essential commodities in the State.

The Reserve Bank of India, Planning Commission, Labour Bureau, Ministry of Agriculture, Central Statistics Office etc., will formulate various monetary and fiscal policies in the light of price trends /Index Numbers released from time to time.

The Government of Andhra Pradesh also constituted a Standing Committee for scrutiny and approval of the CPI-IW of State Series with the representatives from Employers and Employees side.

The Directorate has been collecting data on Prices, Wages and construct of Indices on various prices to meet the requirement of both Central and State Governments, in addition to the estimation of Gross State Domestic Product (GSDP) and Gross District Domestic Product (GDDP).

The indices released by the Government of India viz., Consumer Price Index of Industrial Workers, Agricultural Labourers & Rural Labourers, Urban, Rural & Combined and Wholesale Price Index are also included in this report.

This Publication is divided into three parts i.e., Prices, Wages and Index Numbers. The details are as follows.

Part-I (Prices):

- 1) Daily Retail Prices of 6 Essential Commodities,
- 2) Weekly Retail Prices of 30 Essential Commodities,
- 3) Wholesale Prices of 40 Agricultural Commodities,
- 4) Agricultural Prices (Farm Harvest Prices)
- 5) Prices of Livestock & Livestock Products
- 6) Prices of Building Material

Part-II (Wages):

- 1) Wages of Agricultural and Non Agriculture Labour
- 2) Wages of Construction Labour

Part-III (Indices):

- 1) Consumer Price Index Numbers for Industrial Workers of both State & Central Series
- 2) Consumer Price Index Numbers of Agricultural Laborers & Rural Labourers
- 3) Cost of Construction of Building Material
- 4) Wholesale Price Index.
- 5) Consumer Price Index numbers of Urban, Rural & Combined.

Part - I PRICES

Price is the consideration paid in exchange of acquisition or availment of goods or services either in cash or in kind or in both. It denotes the rate at which goods are exchanged for money. Therefore, it might be difficult to judge as to which is the cause and effect. Prices influence both the quantum of production and the pattern of consumption. However, changes in the prices of different commodities affect different sections of society differently. As such, it becomes necessary to compile different types of Price Statistics, each of it has its own importance and impact on the economy.

Prices have classified into three types viz., Retail Prices, Wholesale prices, Farm Harvest Prices. The following types of prices are being collected by this Directorate to cater the needs of various users.

Type-I (Retail Prices):

The Directorate is collecting and compiling the retail prices of

- a) Daily Retail Prices of 6 Essential Commodities,
- b) Weekly Retail Prices of 30 Essential Commodities
- c) Quarterly Prices of Building Materials
- d) Consumer Price Index for Industrial workers.

Type-II (Wholesale Prices): The Directorate is collecting and compiling the Wholesale prices of

- a) 40 Agricultural Commodities
- b) Livestock, Livestock Products & Livestock Feed

Type-III (Farm Harvest Prices):

The prices received by farmers for their produce at the village site. At present, Farm Harvest prices are being collected for 23 Principal Agricultural Commodities.

Type- IV the Directorate is also collecting and compiling the wages of

- a) Agricultural labourers & Rural Labourers
- b) Construction workers

RETAIL PRICES: Retail prices are those actually charged to the consumers for cash transaction and are inclusive of all taxes which are payable by them. However, rebates and discounts given to consumers in general are taken into account. Thus, the retail price may be defined as money cost to the consumer of a specified unit of

sale which is inclusive of all taxes but excludes all rebates, discounts, etc

- Retail prices are used to monitor prices of essential commodities for the benefit of consumers in order to ensure affordable prices.
- Retail prices are also used to construct consumer price indices
- These prices have been collecting on daily & weekly for monitoring at different levels right from Divisional head quarters to State in order to take faster and effective Market intervention.

Primary objective of the collection and submission of the retail prices of essential commodities regularly on Daily, Weekly, Monthly and Yearly basis to the Government, Civil supplies Department and to the Group of Ministers so as to take appropriate measures for achieving the desired stability in prices.

1) DAILY RETAIL PRICES:

The Directorate has been collecting the prices of six Essential commodities from 42 Revenue Divisional Head Quarters in the State on daily bases and compiled on daily /weekly/Monthly bases to monitor Price trends. The details of (6) Commodities prices collected are Rice, Redgramdal, Groundnut Oil, Tamarind (with / without seed), Red Chillies (dry) and Onions altogether in 13 grades.

Period of Collection: On all working days.

Time of Collection: Every day between 10.00A.M to 1.00 P.M

Transmission of Information: Immediately after collecting the information, the data will be transmitted to the DES through the Web application.

Users: The Directorate will furnish the information of all 42 centers along with State averages to the Commissioner of Civil Supplies every day. Weekly / Monthly consolidated report is also being furnished to the commissioner of Civil Supplies and submitted to the Group of Ministers during the review meetings

Note: The Daily prices data of six essential commodities has been tabulated into Month-wise and District-wise and the Monthly average has presented in Tables 1to3.

Centre wise prices are available on DES Web-site.

2) WEEKLY RETAIL PRICES

The Directorate is also collecting and compiling the Retail Prices of 21 Essential Commodities from all the 42 Revenue Divisions in the State on Every Friday in 30 grades.

Utility: State consolidated report is submitted to the review meeting of Group of Ministers in addition to furnishing to the following departments regularly.

- The Principal Secretary to Govt., Plg Dept.
- The Commissioner of Civil Supplies,
- The Principal Secretary to Governor
- The Economic Advisor, R.B.I.

Table 4-6 represent Month-wise and District-wise weekly 30 essential commodities data along with Monthly average prices.

3) WHOLE SALE PRICES: Wholesale Price is generally taken as the rate at which a relatively large transaction or purchases, usually for further sale, is effected. . The price includes all incidentals born by the purchaser such as cost of container, charges for weightment, Wholesalers Commission, Market Fees and Taxes, charity if any etc.

COLLECTION OF PRICES

The Wholesale Prices of '40' Agricultural Commodities are collected once in a month from all wholesale centres in the State. The data will be consolidated at the district headquarters and the district report transmitted through online.

The wholesale prices for each of the agricultural commodities are collected variety-wise. The variety of the items has been selected based on major transactions.

Month wise and Commodity wise Wholesale Price is given at Table-7.

SELECTION OF CENTRES

The centres have been selected based on the availability of the commodity in the District.

GENERATION OF REPORT

State Average Wholesale Price are generated on monthly basis

USAGE

The data collecting through monthly reports is used for verification of the market trends in comparison with "Farm Harvest Prices" and "Retail Prices".

4) AGRICULTURE PRICES

Agricultural prices have enormous economic and political implications. These not only bring a balance between demand and supply but also affect the inter-sectoral distribution of income and the rate of capital formation in the farm sector. In our country, still more than 60 percent of the workforce eke out their livelihood from Agriculture.

In view of the importance of the sector, it has become imperative to have proper monitoring the agricultural prices.

Usage: These Prices used in the estimation of GSDP/DDP, (i.e for arriving the gross value of output of each commodity)

The prices, which are using in the estimation of GSDP are Agricultural Producer Prices i.e. Price received by farmers for their produce at the Village site, first stage sale of produce immediately after harvest.

NEED

Farm Harvest Prices are being collected for 23 Principal Agriculture Commodities.

(a) FARM HARVEST PRICES

Farm Harvest Price is defined "as an average price at which the commodity in bulk is disposed off by the producers at the village site during the specified harvest period". Farm Harvest Prices are collected during the Peak Marketing Period i.e., for six to eight weeks during peak harvest in both Kharif and Rabi Seasons separately. These Prices have been collected for 23 Principal Agriculture Commodities viz., 1. Paddy, 2. Jowar, 3. Bajra, 4. Maize, 5. Ragi, 6. Korra, 7. Red gram, 8. Bengal gram, 9. Black gram, 10. Green gram, 11. Horse gram, 12. Cane Jaggery (Gur), 13. Onions, 14. Turmeric, 15. Chillies Dry, 16. Coriander, 17. Groundnut, 18. Gingelly, 19. Safflower, 20. Castor, 21. Mesta, 22. Cotton Kapas and 23. Tobacco(v).

Weighted average method is used (with production as weight) to obtain State Weighted Average Farm Harvest Price. The Farm Harvest Prices (weighted) for the years 2013-14 for Kharif and Rabi Seasons are furnished in Table – 8.

(b) RYTHU BAZAR PRICES

Andhra Pradesh is the second Largest producer of fruits, vegetables and flowers in the Country. The predominantly grown fruit crops are Mango, Banana, Cashew nut, Sapota, Guava and Pomegranate, Brinjal, Lady'sfinger, Onions, Tomatoes, Beans and Gourds are the major vegetables produced in the State.

Regulated Market Yards for fruits and vegetables are functioning only at few centers in the State. The Marketing system for fruits and vegetables is in the hands of middlemen. Middlemen exist at various levels between the farmer and the consumer and exploit through malpractices in weighments, handling and payments.

Large number of small farmers is unable to effectively bargain for a better price in the wholesale markets. Inefficiencies in wholesale markets result in a long chain of intermediaries, multiple handling and loss in quality and increase the gap between producer and consumer prices. Intermediaries and system inefficiencies consume a disproportionate share of consumer prices. Large number of small retailers, each handling small quantities, create high overheads leading to high margins on produce.

It was therefore, felt necessary to evolve an alternate marketing strategy where both growers and consumers are benefited through Rythu Bazars. Rythu bazars are thus planned for direct interface between the farmers and the consumers eliminating middlemen. Rythu Bazars, if function effectively can act as price stabilization centres.

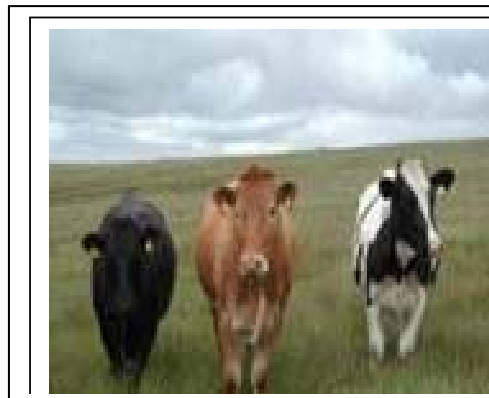

The price fixation in Rythu Bazars shall be through a committee of farmers and the Estate Officer.

Adequate care should be taken to fix the prices realistically. If the prices in Rythu Bazars are higher than the local market rate, there is no incentive to consumers. And if the prices fixed are lower than the wholesale market rates there is no incentives to farmers.

The consumer will get commodities relatively at fair price when compared with local markets and street vendors.

5) WHOLESALE PRICES OF LIVESTOCK, LIVESTOCK PRODUCTS & LIVE STOCK FEED

Andhra Pradesh is well known for its livestock wealth which is rapidly expanding sector, playing a significant role in the rural economy by providing gainful employment to a large number of rural populations and raising their economic status. Thus Livestock is a sub-sector of Agriculture and contributes around 6 to 7% to state GDP.

The Directorate have been collecting the monthly whole sale prices of Live Stock, Livestock Product, Poultry and Livestock Feed for 69 items from 53 selected centers covering all 13 Districts in the State. These prices are used to estimate the Gross State Domestic Product from live stock sector at state level. These prices are collected at the point of production or at the first sale point.

II. METHODOLOGY: The prices prevailing in the primary markets where bulk transactions take place have to be collected monthly on last Friday of the month. The wholesale prices data pertaining to Livestock and Livestock Product , Poultry and Livestock Feed are classified into three broad groups (i.e collected in Three Formats) which are as follows

FORMAT-1: Prices of Cattle, Buffaloes (Cross Breed & Indigenous), Sheep, Goat, other animals and Milk & Wool are collected in this format.

FORMAT-2: Prices of of Livestock Products such as meat, head, legs, Hide and skin etc., are collected in this format.

FORMAT-3: Prices of Poultry and Livestock Feed etc., are collected in this format.

Collection of Prices: The data is collected from all Districts in the state once in a month by following methodology as given below:

- The information relating to “Live Stock Particulars” are collected from Cattle Sandy (Market)@ One popular center per District
- The Prices relating to “Live Stock Products” are collected from Slaughter House @ one popular market center per District
- The Prices relating to “Poultry Products and Feed” are collected from Predominant Poultry farms area (two poultry farms per district)
- The prices relating to “Eggs” are collected from “NECC Publication”
- The prices relating to “Wool” are collected from the Kurnool district only
- The Prices relating to “Milk” are collected from milk collection child centre in the selected village.

The data is processed and consolidated reports of monthly District average prices of Livestock, Livestock Products and Live Stock Feed are worked out. The State Annual Average Prices are being used by the State Economy Division for completion of GVA from Live Stock sector in Andhra Pradesh.

A Statement showing the District-wise prices of Livestock, Livestock Products & Live Stock Feed for the year 2013-14 is given in Table -9.

6) Building Material Price and Wages of Construction Labour.

The main objective of the collection of these data has been to compile an index number of:

- i. Building materials prices.
- ii. Building labour wages and
- iii. Building construction costs for important centers

The data collected also shows the trend of prices of building materials and wages of certain categories of construction labour. Presently, the data on prices and wages are being collected from 26 centres spread out in the state.

A detailed procedure for collection of such data has been laid down by the NBO along with instructions to cover special situations which might involve a process of substitution or the prescribed grade and variety of different building materials. Necessary proformae for collection of data have also been prescribed.

A). Building Material Price: The main aim for price data collection is to know the price change of the prescribed quantity and quality at a particular centre on a particular date. While collecting data on Building material price this factors has to be strictly followed.

1. Price of same quality to be collected every time
2. Unit must be the same
3. Quantity must be the same
4. Price must be collected from the designated shop, and pre decided market of the centre.
5. Price must be collected on the last working day of each quarter.
6. Price should be the one the builder actually paid, it should include the sales tax and local tax if any.
7. Data has to be collected without interval/break.

In case, if prescribed grade and variety is not available in the selected shop, the price for the same item is collected from the reserved shop. If that is also not available, the price may be collected for the prescribed quality and quantity in any other shop in the market. In case prescribed quality is not available, then commonly used quality is selected.

b). Building Labour wage

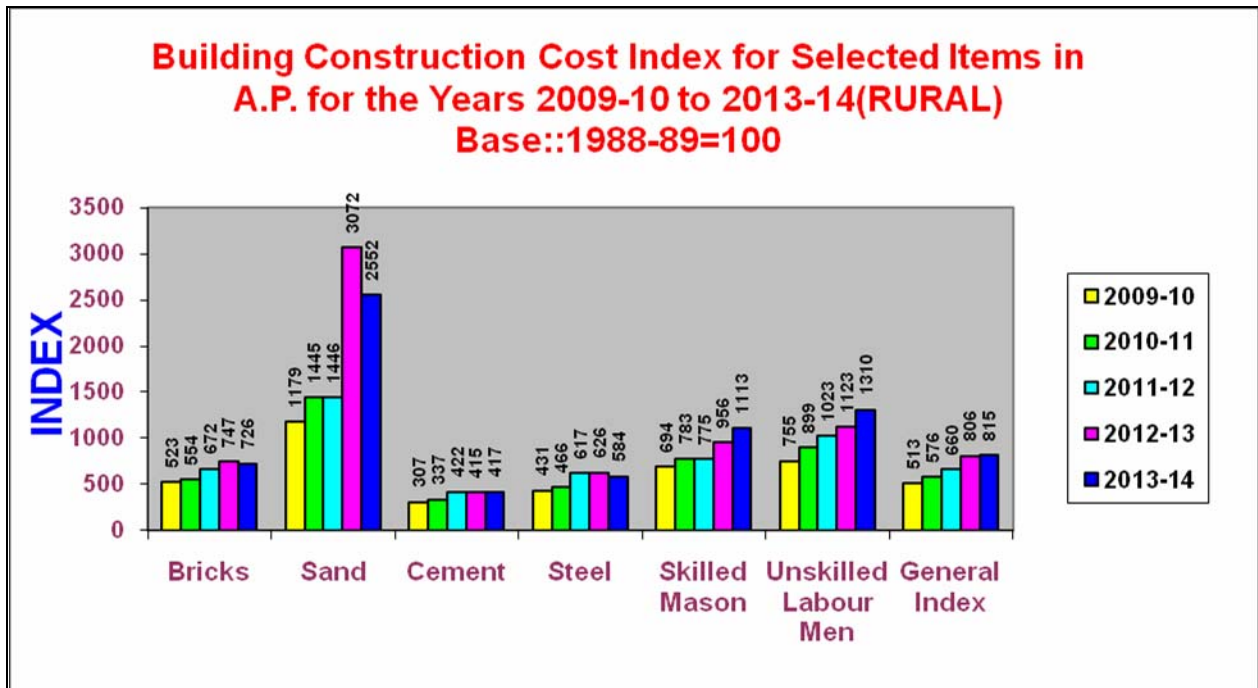

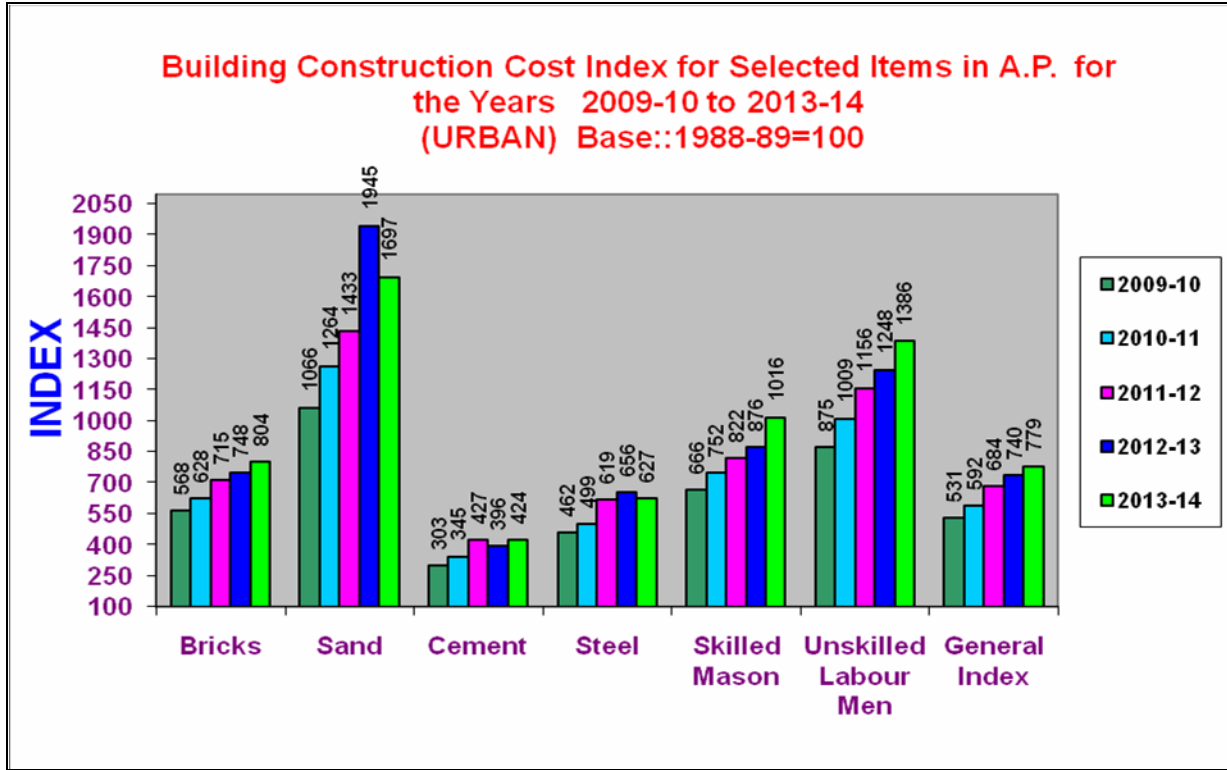

The wage rates are collected for the particular centre as follows

1. The prevailing wage on the last working day of each quarter
2. For each specified category of worker possessing a particular skill, experience and efficiency.
3. All remuneration capable of being expressed in terms of money and payable to employee should be taken in to account.

COLLECTION OF ITEMS

The General items for which the quarterly prices are to be collected given in this form are 1.Bricks 2.Sand 3.Stone Blast 4.Lime 5.Timber 6.Cement 7.Steel 8.Stone- slabs for flooring 9.Asbestos Cement Sheets 10.Tiles 11.Paints and Varnish 12.Sheet Glass 13.Sanitary wares 14.Electrical Fittings 15. Wage Rates of Building construction labour.

The Building Construction Cost Index for the years 2009-10 to 2013-14 for URBAN and RURAL are presented below.

Part II

WAGES

Agriculture Labour is one of the most vulnerable segments of the country's Labour force. The regular wage employment in the rural areas is an exception rather than rule. Casual employment is the norm with seasonality as characteristic feature depending upon the agricultural operations. Collection of regular data on Agriculture labour is of paramount importance for formulation of Wage policy and for enforcement of Minimum Wages in the State.

1) WAGES OF AGRICULTURAL AND NON –AGRICULTURAL LABOUR

Rural labour constitutes the most vulnerable segment of the unorganized work force. Being unorganized and scattered, the rural labour is deprived of the benefits of labour enactments and employer-employee relationships on contrary, their counter parts enjoy in the organized sector of the industries. Agricultural and Non agricultural labourers have to face themselves with the casual employment and frequent changes of employers as well as places and with no fixed pay.

The wages of Agriculture Labour constitute one of the major components in the cost of production of crops. It is therefore, essential to have a periodical data on wages paid to different Occupations of Agriculture Labour in order to asses the trends of Agriculture Commodities costs and also to compare the Agriculture wages paid with that of minimum wages fixed to the different occupations of Agriculture Labour in the different regions in the State.

The DES collects agricultural and non agricultural labour wages on Monthly basis to fulfill the needs of Ministry of Agricultural, GOI .

METHODOLOGY: The Directorate collects the information on Daily Wages of Agricultural and Non-Agricultural Labour from 44 selected villages (Centers) at the rate of three villages from each district where Rural and Agricultural Labour concentrated by covering 42 Divisions from 13 districts for 23 occupations in the State. The selected villages also represent the different regions i.e., Wet, Semi-wet and Dry tracks of the districts in order to reflect all the regions in the State.

DATA COLLECTION: The concerned Mandal ASO collects the information during last Friday of every month by oral enquiry from local knowledgeable persons who engages the labour and who works as labour along with consulting from the Village functionaries like VAO,VRO,VEO and other village officials are the primary informants for data on wage rates. The prevailing wage rates in cash and kind for the reported 8 working hours are to be collected by gender-wise for each of all occupations in the selected centre.

In case the wage rates are reported for a duration of less or more than the normal working hours, and are first adjusted for eight hours working per day. Payment of wages made in kind are very common in rural areas which include food grains etc., Wages reported in kind are valued at the prevailing local retail prices.

Daily wage: It is defined as payment received for services rendered in a day and includes payments in cash and imputed value of payments in kind.

A day:- It is defined as 8 working hours.

PROCESS OF COMPILATION OF AVERAGE WAGE RATES

The centre wise data received for 23 occupations from the districts is computerized. Before computerization, the data is thoroughly scrutinized and discrepancies, if any, are referred back to the field for clarification. In the next stage, occupational wise collected data grouped in to category wise and arrived at average monthly wages for four different categories. District-wise and monthly State Average of Daily Wages of Agriculture and Non Agriculture labour are compiled.

The information collected are compiled for the following categories.

1. Skilled Labour :- A) Carpenter B) Blacksmith C) Cobbler
2. Field Labour :- A) Men B) Women C) Non-Adult
3. Herdsmen :- A)Men B)Women C) Non-Adult
4. Other Agrl.Labour :- A)Men B)Women C)Non-Adult .

SKILLED LABOUR: Those labour engaged in preparation and servicing of Agricultural implements comes under this category such as Blacksmith, Carpenter and Cobblers of that village.

FIELD LABOUR: Those labour engaged in this category are Ploughing, Sowing,Weeders, Transplanters, Harvesting Winnowing, Threshing, Picking etc.,

HERDSMEN: Those engaged in Rearing, Grazing Cattle, Sheep, Goat etc., are termed as Herdsmen. They may be either engaged on annual basis, monthly or daily basis.

OTHER AGRICULTURAL LABOUR: Other Agricultural Labour includes labour engaged in digging the irrigation wells, deepening the wells, operating the irrigation channels and wells, labour engaged in spraying pesticides and applying manures etc.

INDEX OF DAILY WAGES OF AGRICULTURAL LABOUR

After collecting the monthly Daily wages, the Directorate has been compiling category wise average of wage price relatives by taking 1980-81 =100 as a base year and submitting the report to the Ministry of Agriculture and cooperation, Govt. of India.

Part III

INDEX NUMBERS

Price Index is an indicator of the average price movement over a period for a fixed basket of goods / services. The constitution of the basket of goods & services is done keeping in to consideration whether the changes are to be measured in Retail, Wholesale prices etc. It is also considered as a barometer of economic activity. There are two types of price indices, namely, the Wholesale price index (WPI) and the consumer price index (CPI), compiled in the country.

1) Consumer Price Index : The main objective of the Consumer Price Index is to measure changes over a period of time in the level of retail prices of a fixed basket of goods and services of a targeted group of people consume.

- There are four consumer price indices compiled in the country for different segments of consumers, namely, the industrial workers (IW), agricultural labourers (AL) and rural labourers (RL). CPI (Rural, Urban and combined).

CONSUMER PRICE INDEX NUMBERS FOR INDUSTRIAL WORKERS(CPI-IW)

Base Year	: 2001 = 100
Compiled By	: Labour Bureau for Central Series : Directorate for State series

INTRODUCTION

The history of compilation & maintenance of Consumer Price Index Numbers for industrial Workers owes its origin to the deteriorating economic condition of the workers on account of abnormal rise in prices following the First World War. As a result of sharp rise in prices and the cost of living, some Provincial Governments started conducting Family Budget Enquiries and compilation of Consumer Price Index Numbers for Industrial Workers in the country. But none of them was entirely satisfactory.

In pursuance of the recommendations made by the Rau Court of Enquiry, the job of compilation & maintenance of Consumer Price Index Numbers for Industrial Workers was taken over by the Central Govt. in 1941.

However, the compilation of index numbers on uniform and scientific lines was started only after the conduct of the Family Living Surveys during 1958-59 at 50 important industrial centres, spread over length and breadth of the country, and compilation of Consumer Price Index Numbers for Industrial Workers on base 1960=100. Since then the compilation and maintenance of Consumer Price Index Numbers are being done by the Labour Bureau on a continuous basis.

- The series (1982=100) had replaced the old (1960=100) series in December, 1988 with the release of October, 1988 index.

- The new series on base 2001=100 has been released on 9th March, 2006 with January, 2006 index which has replaced the earlier (1982=100) series.

SCOPE AND COVERAGE : Under the 1960 series of Consumer Price index Numbers for Industrial Workers, the coverage of Industrial Workers was limited to 3 sectors i.e. Factories, Mines and Plantations. The coverage of the Industrial Workers for 1982 and 2001 series for the conduct of working class Family Income & Expenditure Surveys were extended to seven sectors by including four more sectors viz. i) Railways, ii) Public Motor Transport Undertakings, iii) Electricity Generating and Distributing Establishments, and iv) Ports and Docks.

⇒ A Working Class Family is defined as one wherein one of the members worked as a manual worker in any of the 7 sectors and derived half or more of its monthly income through manual work.

Under the 2001=100 series, the Labour Bureau has been compiling Consumer Price Index Numbers for Industrial Workers for 78 selected centres and all-India as against 70 centres in the 1982 series. These 78 centres were selected on the basis of their industrial importance in the country and distributed among different States in proportion to the industrial employment in the State subject to a maximum allotment of 5 centres per state per sector.

WEIGHTING DIAGRAM:

The Centre-wise Weighting Diagrams for the Index has derived from results of Working Class Family Income and Expenditure Surveys conducted during 1999-2000 in all the 78 selected centres. The survey was conducted over a period of 12 months in each and every selected centre during 1999-2000, with an equal number of sample of families was canvassed every month.

As it was not feasible to monitor the price behaviour of all the items on which index population reported consumption expenditure (nor it is necessary), only representative items were retained in the index basket, which were manageable over time. For this purpose, the first step was to form group of items which meet similar or related demands of the consumers.

The total expenditure on consumption items was divided into 6 main groups viz.,

- I - Food
- II - Pan, Supari, Tobacco & Intoxicants
- III - Fuel & Light
- IV - Housing
- V - Clothing, Bedding & Footwear
- VI - Miscellaneous

In the first and the last group, a few well-defined sub-groups have also been formed.

Weights, which indicate relative importance attached to different items of goods and services consumed by the index population, are determined on the basis of expenditure made by the targeted industrial workers on these goods and services. However, the expenditures on non-consumption items are excluded from the weighting diagram.

The items directly retained in the basket were those which a) constitute at least one percent expenditure in the Group/Sub-Group; (b) had significant number of families reporting expenditure; and c) could be priced satisfactorily over the life of the series. The remaining items were imputed to related items or to a group of items depending upon their similarity of want satisfying capacity, manufacturing process or price behaviour, etc. The percentage expenditure on each item in the sub-group/group represents its weight. Similarly, the percentage expenditure on sub-group/group in the Group/Total consumption expenditure represents their weight.

RETAIL PRICES

The retail prices used in the index calculation are those actually charged to the consumers for cash transaction and are inclusive of all taxes which are payable by him. However, rebates and discounts given to consumers in general are taken into account. Thus, the retail price may be defined as money cost to the consumer of a specified unit of sale which is inclusive of all taxes but excludes all rebates, discounts, etc. The retail prices of price sensitive items such as cereals, pulses, vegetables & fruits, oils & fats, etc. are collected on a weekly basis. Similarly, the prices of some other items like cinema, furniture, utensils, clothing, house-hold appliances, etc., which are known to vary less frequently, are collected on monthly basis. However, the price data relating to house rent, school/college fees and books, etc. are collected on six-monthly/yearly basis as these items do not show much change in their price behaviour.

The retail prices of the selected items are collected on the fixed date/day. While collecting prices, various elements such as fixity of markets, shops, specifications, unit of purchase, day and time of price quotations, etc. are maintained for the purpose of comparability.

HOUSING INDEX

For compiling housing index, the rented, self-owned and rent free houses are taken into account. The rental data for self-owned houses are collected from the comparable rented dwellings of the locality or within the vicinity of the locality. However, for rent-free houses, rent index is frozen at 100. Thus, for compiling the housing group index, three separate indices are compiled for rent-free, rented and self-owned houses and these indices are combined by using their respective weights, which are proportion of families residing in these three categories of houses, to work out the weighted housing index for the centre. Housing index is compiled by following 'Chain Base method', once in every six months viz., January and July and kept constant for the subsequent five months. Rental data, for utilising in the compilation of housing index, are collected twice a year, from a sample of dwellings through half yearly Repeat House Rent Surveys.

COMPILATION OF INDEX:

The index is compiled by using Laspeyres' modified Index formula, as given below :-

$$I_n = \frac{\sum P_n Q_o}{\sum P_o Q_o} \times 100 \quad \text{Or} \quad I_n = \frac{\sum \left(\frac{P_n}{P_o} \times 100 \right) P_o Q_o}{\sum P_o Q_o}$$

Where : I_n = Index number for current period

P_n = Price for current period

P_o = Price for base period

Q_o = Quantity for base period

In the first stage, price quotations of an item in all outlets of all the markets in a month are averaged for a centre. On the basis of this average price, a price relative (over base period price) is worked out. However, in case of certain items which are supplied through subsidized outlets (fair price shops), first the weighted average price of open market and fair outlets in each selected market of a centre is worked out (weight being availability ratio in the respective outlets in that month). In the next stage, a simple average of these market prices is worked

out to arrive at the centre price. On the basis of this average centre price, a price relative is worked out. The sub-group or group index is worked out as a weighted average of an item/sub-group index respectively. The general index of a centre is worked out as a weighted average of group indices.

An all-India index, which is weighted average of 78 centre indices, is also worked out every month. The weight assigned to each centre is the proportion of the total consumption expenditure of estimated number of families allocated to a centre in the State to sum total of all such expenditure over all centers in the country.

On par with Central Series, the D.E. & S., A.P is also compiling the CPI-IW with same base year 2001=100 for the 6 complex centres and releasing index every Month after approval of Standing Committee. (In AP, 3 central series centres and 3 complex centres state series and one centre namely Jaggayyapet and Miryalagud centre covered both AP and Telagana state.

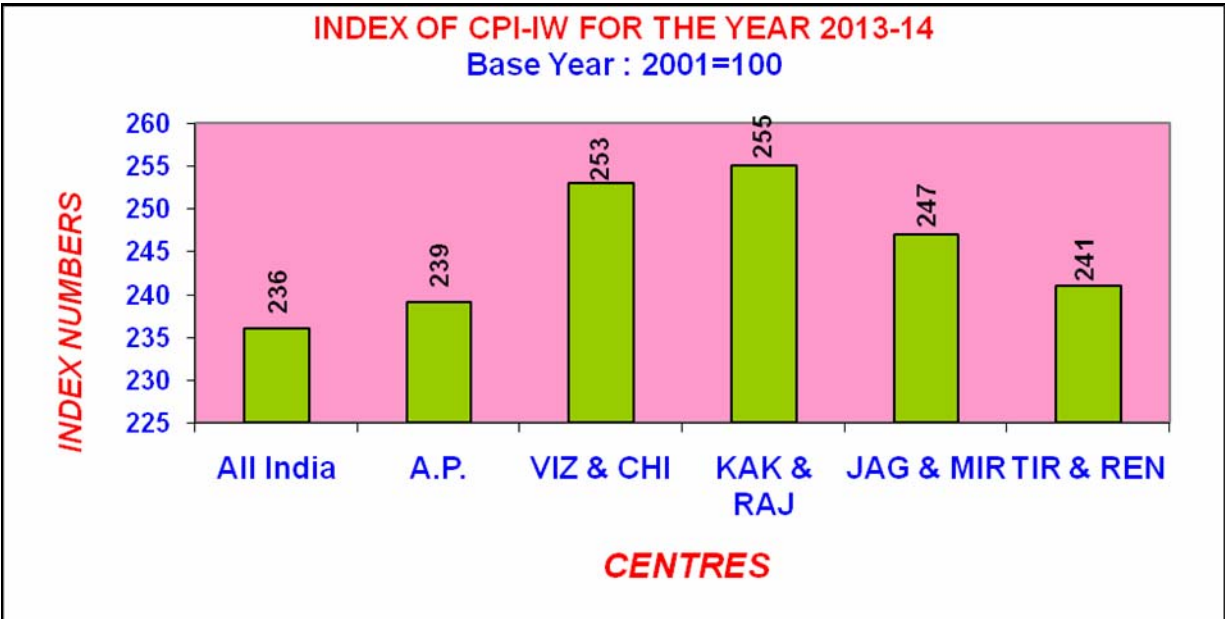

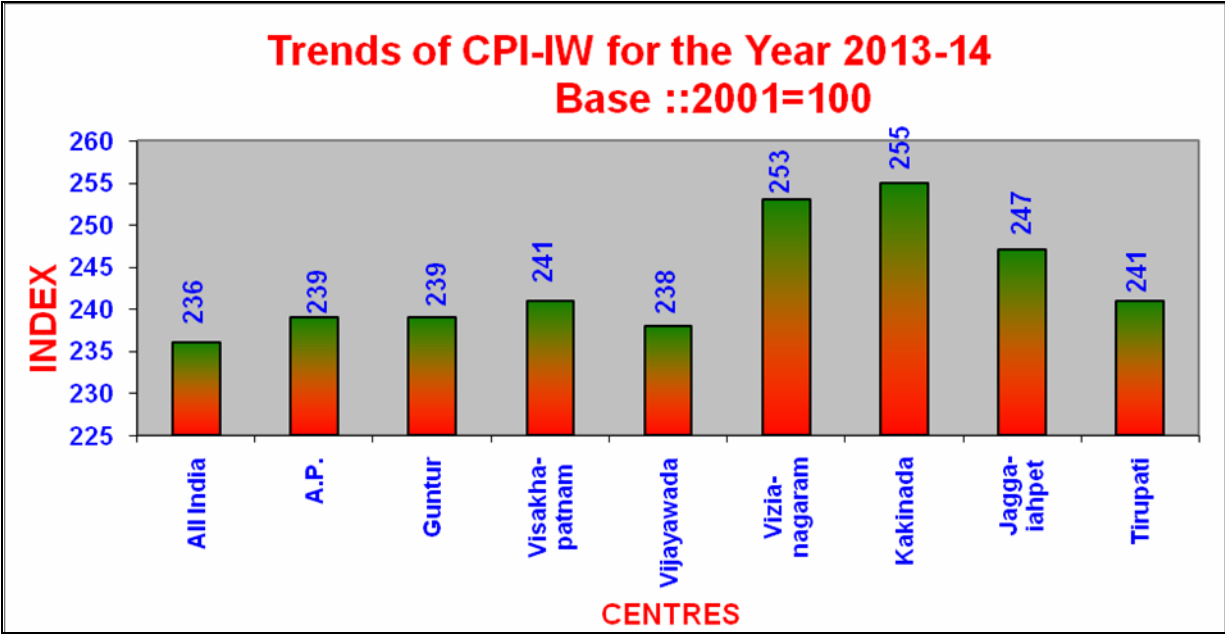

The centers which are covered under Central and State series for base year 2001=100 as follows:

Base Year 2001 = 100			
SI No	Central Series	SI No	State Series
1	Guntur	1	Vizianagaram & Chittivalasa
2	Visakapatnam	2	Rajahmundry & Kakinada
3	Vijayawada	3	Jaggiahpet & Miryalguda
		4	Tirupathi & Renigunta

Web Site : www.labourbureau.gov.in .

Note: 1) The Consumer Price Index Numbers for Industrial Workers (CPI IW) for the Financial Year 2013-14 for 7 Centres of Andhra Pradesh and All India are furnished in the Table-13 & 14

2) Centre-wise Consumer Price Index Numbers for the year 2013-14 are presented below.

2) CPI NUMBERS FOR AGRICULTURAL LABOURERS & RURAL LABOURERS (CPI AL&RL)

Base Year : 1986-87 = 100
Compiled By : Labour Bureau

INTRODUCTION:The Labour Bureau has been compiling CPI Numbers for Agricultural Labourers since September, 1964. The existing series of CPI Numbers for (i) Agricultural Labourers (ii) Rural Labourers (base 1986-87=100) replaced earlier series on base 1960-61=100 w.e.f. November, 1995.

For compilation of these index numbers, the Field Operations Division (FOD) of the National Sample Survey Organisation (NSSO) collects Price data every month from 600 sample villages selected from 20 States . Consumer expenditure data collected by the NSSO during 38th round of NSS (1983) formed the basis of the State wise weighting diagrams for the series.

The methodology approved by the Technical Advisory Committee on Statistics of Prices and Cost of Living (TAC on SPCL) is followed for compilation of indices for 20 States and all-India separately for (i) Agricultural and (ii) Rural Labourers and these indices are released on monthly basis by 20th of every succeeding month.

SCOPE & COVERAGE: The Consumer Price Index Numbers for Agricultural Labour cover the households of agricultural labourers and the Consumer Price Index Numbers for Rural Labour cover the households of rural labourers (including agricultural labourers). The rural retail prices utilised in these two series of index numbers are the same, but the weighting diagrams used for compiling these indices are different.

The State-wise sample sizes were decided by studying the variations in village wise prices in the old series of index numbers and keeping in view the need for constructing State-wise CPI Numbers for (i) Agricultural and (ii) Rural Labourers. The sample size for a State was allocated to the regions within it in proportion to their rural population and in multiples of three. A number of regions were formed within a State, according to similarity of agro-climatic conditions and density of population. Within each region, strata were formed by treating each district as a separate stratum. However, the smaller districts, within a particular NSS region, were merged to form a separate stratum. The allocation to a stratum was generally 3 villages.

WEIGHTING DIAGRAM:

The consumer expenditure data collected by the NSSO, in its 38th Round in 1983, was used for deriving weighting diagrams for all the 20 States and All-India, separately for Agricultural Labourers and Rural Labourers.

The average budget derived from the household consumer expenditure survey recorded expenditure on a large number of goods and services. These items of expenditure were divided into two categories viz., (i) non-consumption and (ii) consumption expenditure.

- Only consumption expenditure was taken into account for derivation of weighting diagrams.
- Expenditure on items like rent and repair of residential buildings or land, direct taxes, priest services (including ceremonial expenditure) and precious jewellery or ornaments (like gold, silver, pearl, etc.) was treated as non-consumption expenditure and thus excluded from the average budget
- The expenditure on rest of the items (including the durable goods) in the average budget was considered as consumption expenditure.

For calculation of the index, groups and sub-groups were formed, to the extent possible, on the pattern of CPI Numbers for industrial workers on base 1982=100 and. The expenditure was categorized into following groups: -

- (i) Food;
- (ii) Pan, Supari, Tobacco & Intoxicants;
- (iii) Fuel & Light;
- (iv) Clothing, Bedding & Footwear; and
- (v) Miscellaneous.

As it was not feasible to include all the items of expenditure in the index basket because of their un-manageability due to large number or existence of items which can not be priced easily or non-availability of regular price data for some of the items, recourse to imputation of expenditure was undertaken.

Imputations were done at four levels, viz., (i) item level, (ii) section level, (iii) sub-group level, and (iv) group level. Item level imputation consisted of straight addition of expenditure of one or more unpriced items to a priced item within the same sub-group/group. Section level imputation consisted of proportionate distribution of expenditure of one or more unpriced items over several priced items which formed a distinct section within a sub-group/group.

After completion of expenditure imputation process, as envisaged above, the resultant expenditure on each item within a sub-group/group was expressed as percentage of the total expenditure on the sub-group/group to obtain item weights within a sub-group/group. Similarly, sub-group/group weights were derived by working out the percentage expenditure, including sub-group/group level imputations, on each sub-group/group as compared to total consumption expenditure. This provided the weighting diagram for compilation of the Consumer Price Indices for (i) Agricultural and (ii) Rural Labourers of each State. From the State-level weighting diagrams, all-India weights have been derived.

SELECTION OF BASE YEAR: A number of factors are taken into account for determining the base year of the series. A period affected by developments of serious nature such as war, floods, draught etc. is not adopted as the base year because it cannot be treated as a normal year. Generally, a year during which the enquiry is conducted or a period not very distant from survey period for which reliable price data are available is adopted as the base year.

The base period of the current series has been taken as agricultural year (July, 1986 to June, 1987). Though there is a gap between the weight base (1983) and the comparison base (1986-87), no adjustment in weights has been made owing to differences in price levels between two periods.

COLLECTION OF RURAL RETAIL PRICES: The Field Operations Division of the NSSO has been assigned the job and responsibility of collection of rural retail prices every month from shops and markets catering to 600 representative sample villages spread over 66 NSS regions in 20 States. Price collection from these sample villages is staggered over the four weeks of a month, with one-fourth of the sample being covered every week. These prices are collected on the fixed price collection day .

TREATMENT OF ITEMS SUPPLIED THROUGH PUBLIC DISTRIBUTION SYSTEM (PDS): For the items which are supplied through Public Distribution System (PDS), the weighted average of fair prices and open market prices are utilised for index compilation. The weight for fair prices is worked out as proportion of the total requirement met through fair price shops and the balance will form weight for open market prices. The availability of these items through PDS will, however, be restricted to the scale of admissibility fixed by the Government. The data in respect of rationed items are collected from selected fair price shops in a specially designed proforma.

COMPILATION OF INDEX NUMBERS: The indices are compiled separately for each of the 20 States at general as well as at sub-group/group level. In the

compilation of the state index, the village-wise price relative of each item is worked out by expressing the current price as a percentage of base year price. A simple average of village wise price relatives is worked out to arrive at regional price relative in the State. Regional price relatives, thus derived, are weighted to arrive at the State level price relatives, the weights being the estimated expenditure of all rural/agricultural labour households in a region as a proportion to expenditure of all the concerned households of all regions in the State.

The State index from these state price relatives is worked out by using the Laspeyres base weighted formula.

All-India Index: The all-India index is worked out as a weighted average of the indices of 20 States, weights being the estimated consumption expenditure of all rural and agricultural labour households in each State as a proportion of corresponding expenditure for all-India. All-India group indices are also compiled by using the State weights in the particular group, derived as a proportion of corresponding expenditure at all-India level.

- a. Annual Index Numbers for agricultural years and calendar years wherever mentioned in the report, unless specified, are simple averages of 12 months.
- b. To obtain indices on old series of CPI-AL (Base: 1960-61=100), the index figures of 1986-87 series need to be multiplied by the linking factors as given below: -

- General Index = 5.89
- Food Index = 6.38

The Minimum Wages Act in 1948 made it mandatory for the fixation and revision of the wages in selected areas to commensurate with the price increase so as to mitigate the erosion in the real wage. Inclusion of Agriculture Labourers in schedule II of the said act necessitated the compilation of the Consumer Price Index Numbers for that category for fulfilling the statutory obligation flowing out of it.

Accordingly, Government of India compiled the Index with the Base 1950-51=100 on the results thrown up by the First Agriculture Labour Enquiry conducted by National Sample Survey Organization (NSSO) in 1950-51. This was replaced by the Base 1960-61=100 Series of the CPI Numbers for Agriculture Labourers with effect from September 1964 on the basis of the results of the Agriculture Labour Enquiry conducted in 1956-57.

Consumer Price Index for Agriculture Labour in Andhra Pradesh and All India and Rural Labour for the year 2013-14 are presented in Table – 12 (C), 15(a) & 15(b).

The CPI for Agriculture Labour & Rural Labour for other States and All India for 2013-14 are placed in Annexure–2 and 3.

3) BUILDING CONSTRUCTION COST INDEX IN A.P.

Base Year : 1988-89=100.
Compiled By : Directorate of Economics & Statistics,
Govt. of A.P., Hyderabad

Construction activity is one of the key economic indicator for measure the development of the state and the country as a whole. Of late, this has become a major activity in the developing countries like India. Lot of money is being spent towards this activity by all sections of people. Purchases and construction of buildings are not treated as consumption expenditure of the households but treated as capital expenditure. This sector contributes nearly 7% in the estimation of GSDP

In order to study the trends of the building materials and wage rates of building construction labour over time and a place and to construct index numbers the National Building Organisations has introduced scheme for collection of prices of building materials and wage rates of construction labours.

Index series show the trends in the item for which the Index is compiled at specified place over a period of time. Index is always time and place specific. A building cost Index series can show the trends in the building construction costs at specified centre over a period of time. (Base year to current year). The price of a structure is made of mainly (a) the cost of materials and (b) the cost of labour. A study of the relative increase or decrease in the cost of these two components during a certain period gives an idea of the trend of construction

The Directorate has been collecting the Prices of Building Materials and Wage Rates of Construction Workers on the last working day of every quarter from 13 District Headquarters and 13 Rural Centres covering one from each District and the State average as well as District wise Price details are being sent to the National Building Organisation, New Delhi along with the wages of the Construction Labour.

The quarterly average Prices are worked out for the State on the basis of the Prices received from the Districts and compiles Index Numbers for Rural and Urban Centres separately.

The Quarter-wise Building Construction Cost Index with the Base year 1988- 89=100 for the year 2013-14 is presented in the Table- 16(A) and 16(B).

4) Whole Sale Price Index

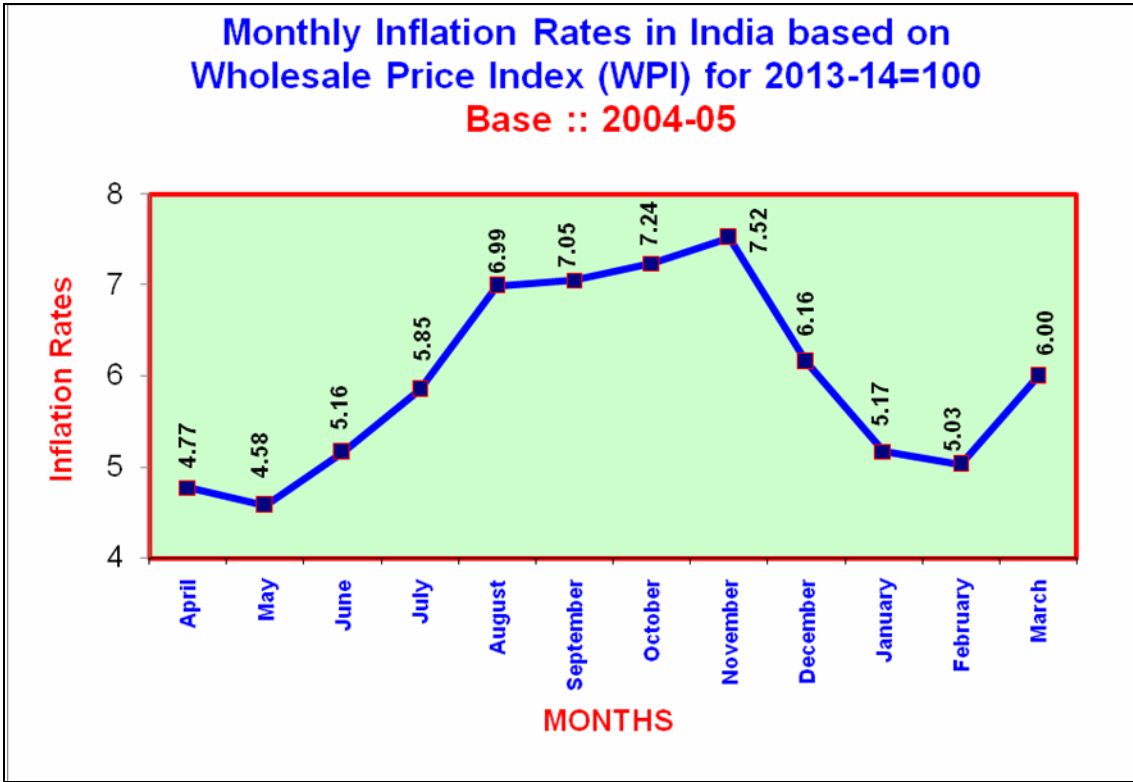

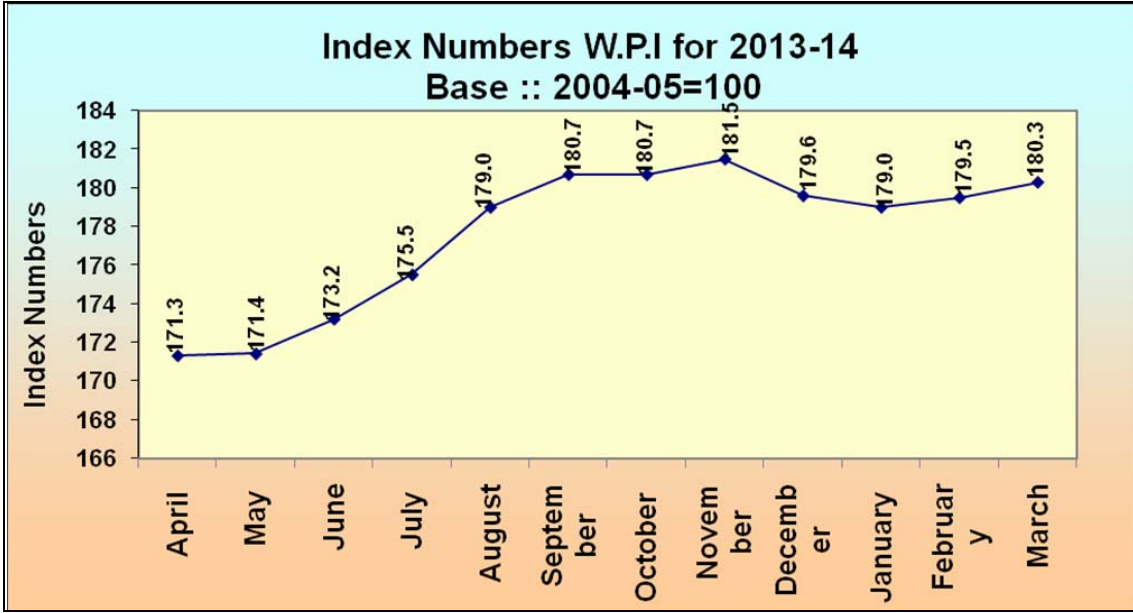

Base Year : 2004-05 = 100
Compiled By : Economic Advisor. Ministry of Commerce
and Industry

WHOLESALE PRICE INDEX (WPI) is compiled and released by the Office of the Economic Advisor, Department of Industrial Policy and Promotion, Ministry of Commerce and Industry on monthly basis.

The WPI measures the average change over a period of time in the selling prices of producer's goods. The concept of wholesale price adopted in practice represent the quoted price of bulk transaction generally at primary stage, the price pertaining to bulk transaction of agricultural commodities (farm harvest prices/prices at the village mandi/ market)and ex-factory prices for others. The base year for WPI is 2004-05.

- **Inflation rate** is calculated on a point to point basis at All India level only i.e., on the basis of the variations between the Wholesale Price Index for the latest week of the current year and Wholesale Price Index for the corresponding week of previous year.
- The base year was changed from 1993-94 to 2004-05 and released the index on 14th September 2010 with new base year. Total number of items was increased from 435 to 676 and number of quotations is also increased. No. of quotations selected for collection of data are 5482 and Some of the important items included are Dish antenna, Microwave oven, cells instant foods etc.

Note: The Index Numbers of the Wholesale Prices in India for all Commodities for 2013-14 with base 2004-05 is placed in Table - 17.

(5) CONSUMER PRICE INDEX NUMBERS FOR URBAN & RURAL AREAS

Base Year : 2010= 100

Compiled By : Central Statistics Office, Govt. of India.

The Price index is an indicator of the average price movement over a period of time in the fixed basket of goods and services. The constitution of the basket of goods and services is done based on consumption pattern.

At present, (3) separate series of index numbers are being compiled to capture the price movements in retail level in India. Details are as follows:

1. Consumer Price Index for Industrial Workers (CPI-IW),
2. Consumer Price Index for Agricultural Labourers / Rural Labourers (CPI -AL/RL)

All these indices are designed to measure the changes in the prices of goods and services consumed by specific segments of population. The National Statistical Commission has recommended that the current CPI series does not encompass the changes in the prices for the entire Rural and Urban population. Hence, there is a need to compile the CPI separately for the entire Rural and Urban populations.

Accordingly, the CSO has taken steps to compile State-wise CPI numbers separately for Rural and Urban areas. Broad features of these series are as under:

CPI for Urban Areas

- CPI (Urban) compiling State-wise as well as at all India level.
- Number of price schedules (Quotations) that could be canvassed was fixed around 1100.
- In Andhra Pradesh 14 towns will be covered and 60 quotations will be collected from 12 Districts.
- The Price collection work has been entrusted to field investigators of NSSO

CPI for Rural Areas

- CPI (Rural) compiling State-wise as well as at all India level.
 - Total of 1183 villages have been selected at all India level.
 - In Andhra Pradesh 54 Villages will be covered for collection of prices for CPI (Rural)
 - The Price collection work has been entrusted to the Department of Posts.
- o Month wise the Index Numbers of the CPI (Urban, Rural and Combined) for the year 2013-14 for All India and Andhra Pradesh are placed in the Table-18.
